

Module 7: DynamoDB Assignment

Problem Statement: You work for XYZ Corporation. Their application requires a database service that can store data which can be retrieved if required. Implement a suitable service for the same. While migrating, you are asked to perform the following tasks:

1. Create a DynamoDB table with partition key as ID.
2. Add 5 items to the DynamoDB table.
3. Take backup and delete the table.

SOLUTION:

Task 1: Create a DynamoDB Table

1. Log in to the AWS Management Console: Open the Amazon DynamoDB console at <https://console.aws.amazon.com/dynamodb/>.
2. Click on "Create table".
3. Enter a name for your table.
4. Specify "ID" as the Partition Key and choose the data type (e.g., String, Number) for the partition key attribute.
5. Optionally, you can add a Sort Key if needed.
6. Configure other table settings such as Provisioned or On-Demand capacity mode, read/write capacity units, etc., according to your requirements.
7. Click "Create".

Default settings

The fastest way to create your table. You can modify these settings now or after your table has been created.

Customize settings

Use these advanced features to make DynamoDB work better for your needs.

Default table settings

These are the default settings for your new table. You can change some of these settings after creating the table.

Setting	Value	Editable after creation
Table class	DynamoDB Standard	Yes
Capacity mode	Provisioned	Yes
Provisioned read capacity	5 RCU	Yes
Provisioned write capacity	5 WCU	Yes
Auto scaling	On	Yes
Local secondary indexes	-	No
Global secondary indexes	-	Yes
Encryption key management	Owned by Amazon DynamoDB	Yes
Deletion protection	Off	Yes

Tags

Tags are pairs of keys and optional values, that you can assign to AWS resources. You can use tags to control access to your resources or track your AWS spending.

No tags are associated with the resource.

Task 2: Add 5 Items to the DynamoDB Table

1. Navigate to the Table: Once your table is created, click on its name to open its details page.
2. Click on the "Items" tab.
3. Click on "Create item".
4. Enter the attribute values for each item. Remember to include the ID attribute as it is the partition key.
5. Click "Save" for each item.
6. Repeat the above steps until you have added 5 items to the DynamoDB table.

Task 3: Take Backup and Delete the Table

Backup Table:

1. Navigate to the table details page.
2. Click on the "Backups" tab.
3. Click on "Create backup".
4. Enter a name for the backup.
5. Optionally, configure backup settings such as Time to Live (TTL).
6. Click "Create backup".

Delete Table:

1. After ensuring that the backup is created successfully, navigate back to the table details page.
2. Click on the "Overview" tab.
3. Click on "Delete table".
4. Enter the name of the table to confirm deletion.
5. Click "Delete".
