

Module 3: IAM Roles Assignment

Problem Statement: You work for XYZ Corporation. To maintain the security of the AWS account and the resources you have been asked to implement a solution that can help easily recognize and monitor the different users.

Tasks To Be Performed:

- 1. Create a role which only lets user1 and user2 from task 1 to have complete access to VPCs and DynamoDB.**
- 2. Login into user1 and shift to the role to test out the feature.**

Solution:

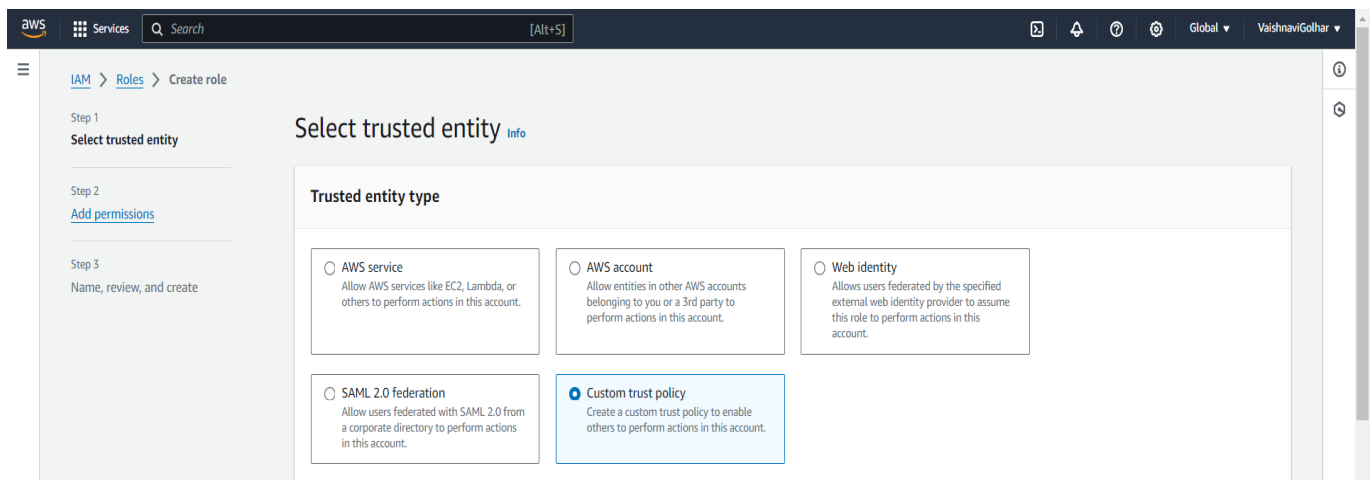

TASK1:

- 1. Sign in to the AWS Management Console using your credentials.**

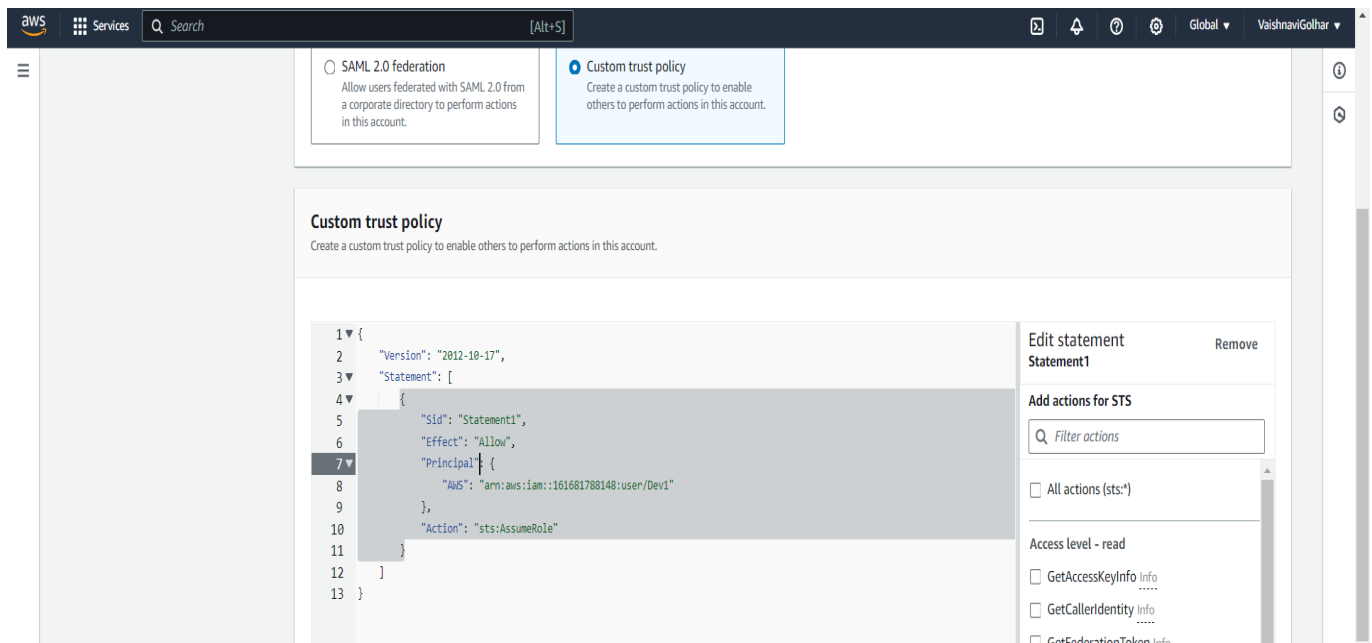

2. Go to the IAM (Identity and Access Management) service from the AWS Management Console.

- Click on "Roles" from the left-hand side menu.
- Click on "Create role" button.

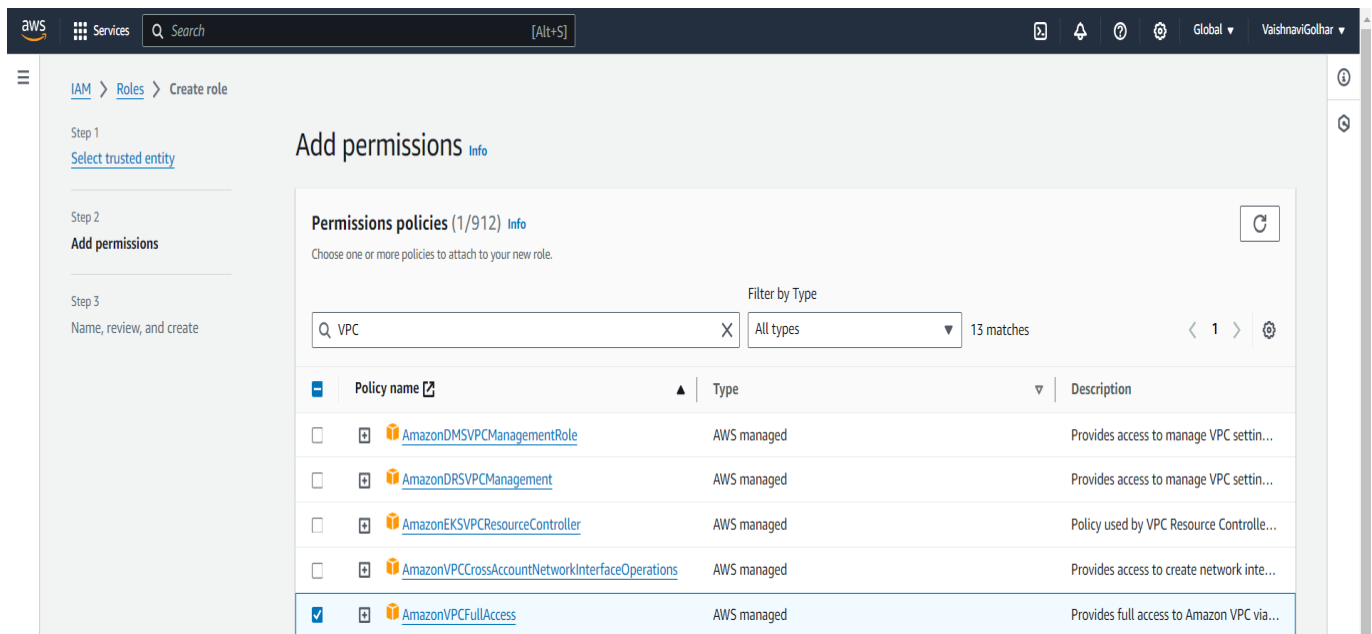

3. Choose the Trusted Entity:

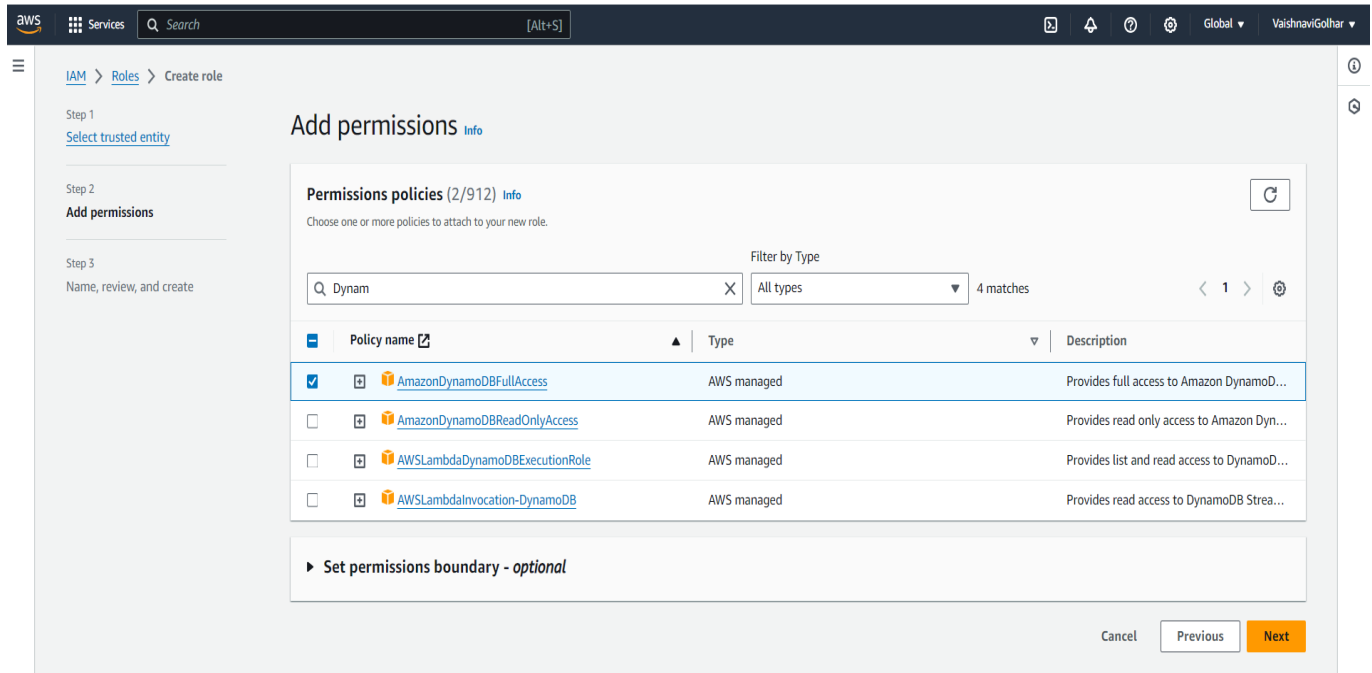

4. Enter the AWS account ID i.e. ARN where user1 reside (User1= Dev1(from task 1))

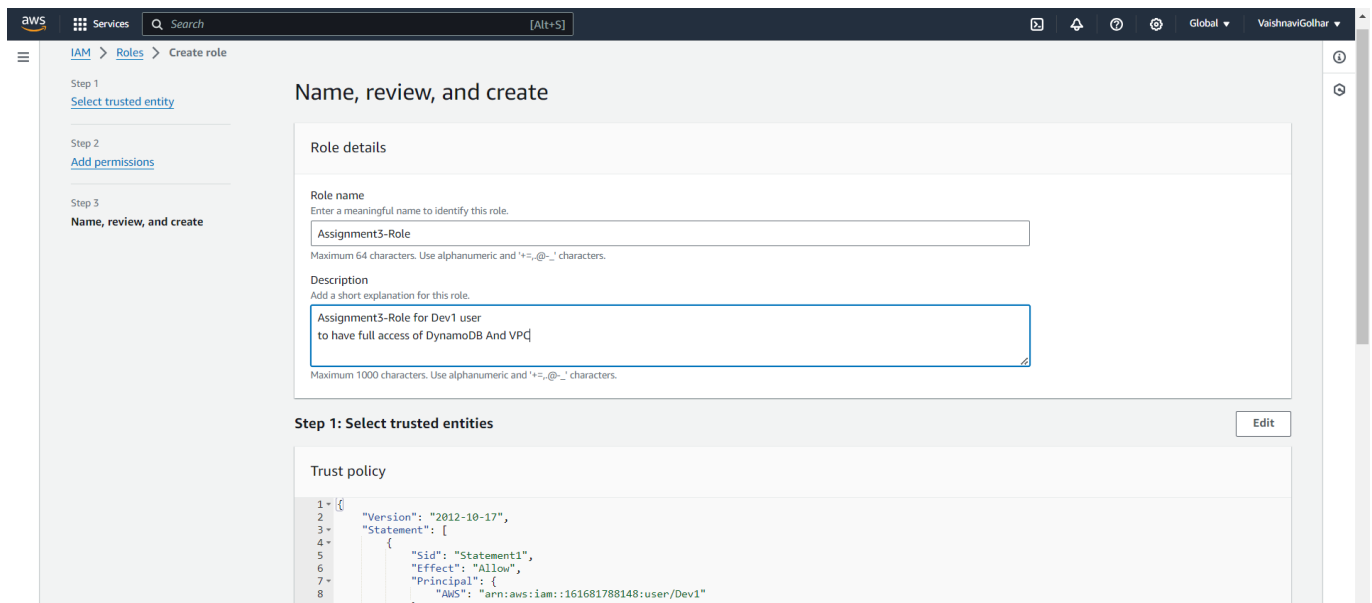

5. In the permissions section, attach the policies for accessing VPCs and DynamoDB.

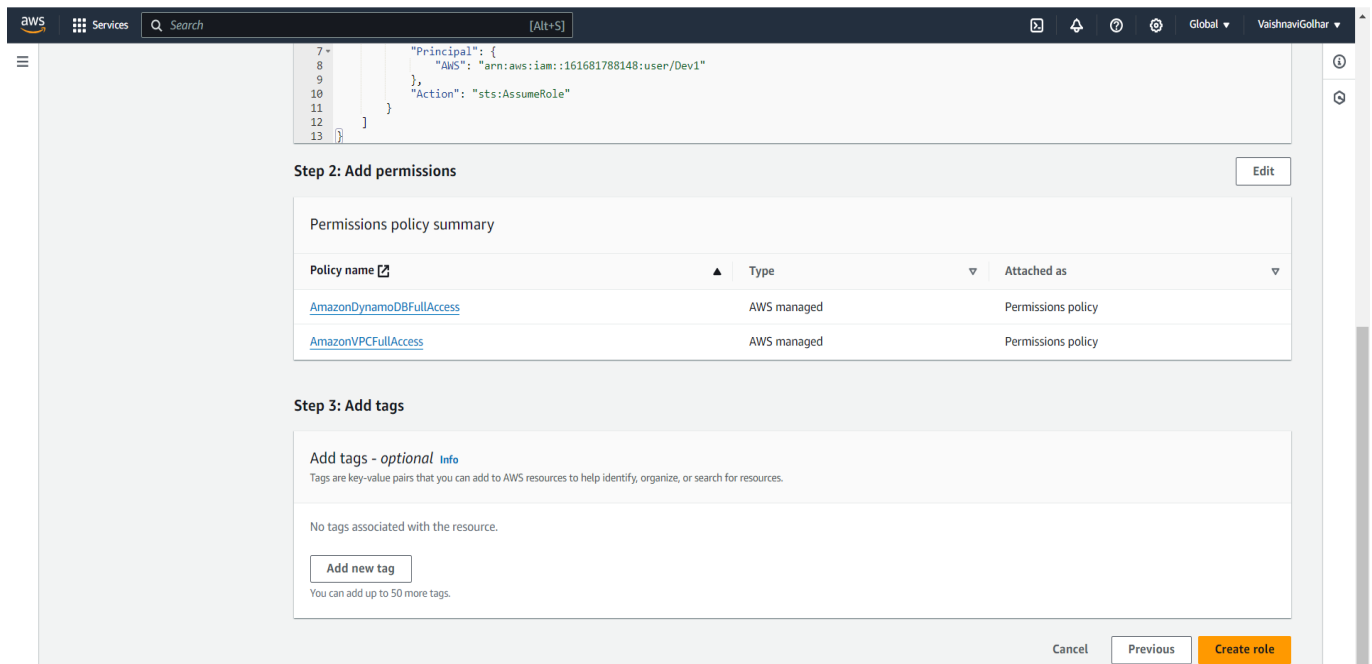

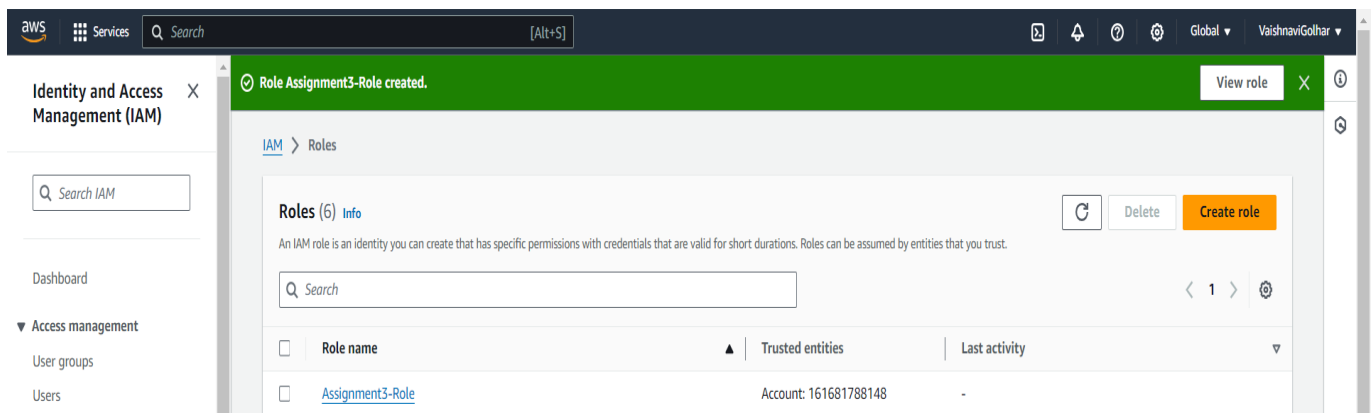

6. Give name: Assignment3-Role

Review the details and click on "Create role".

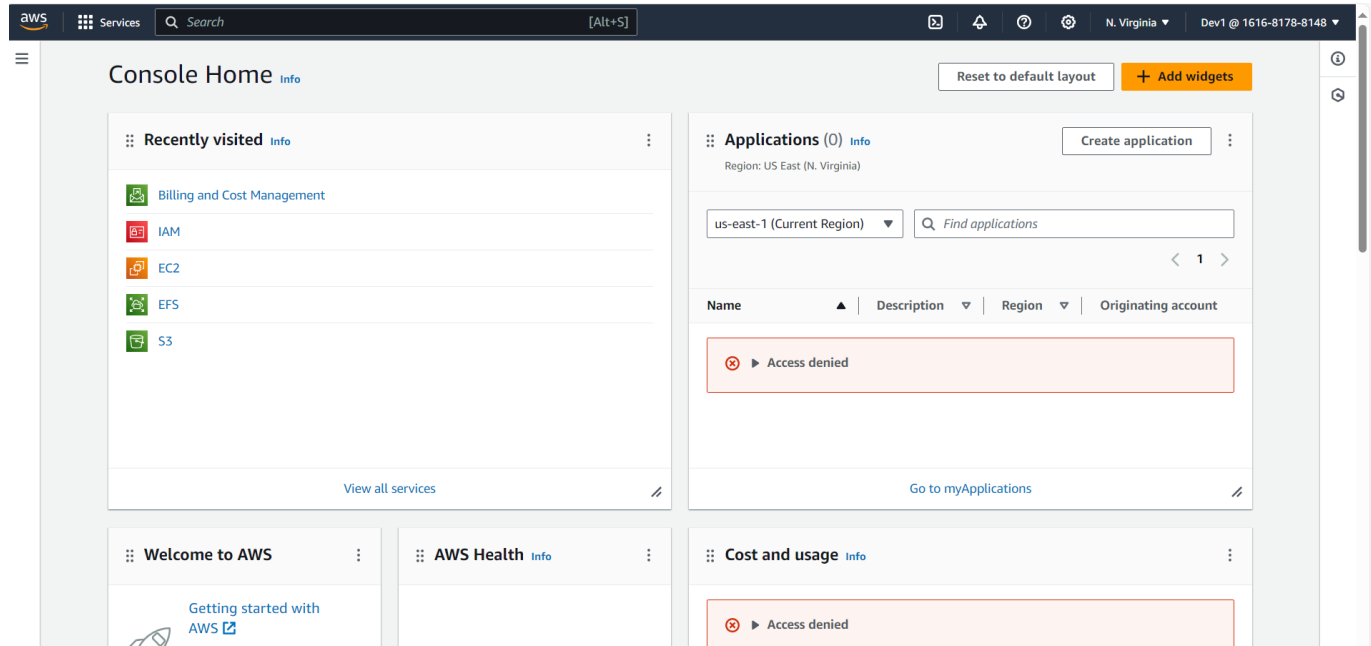

7. IAM role has been created.

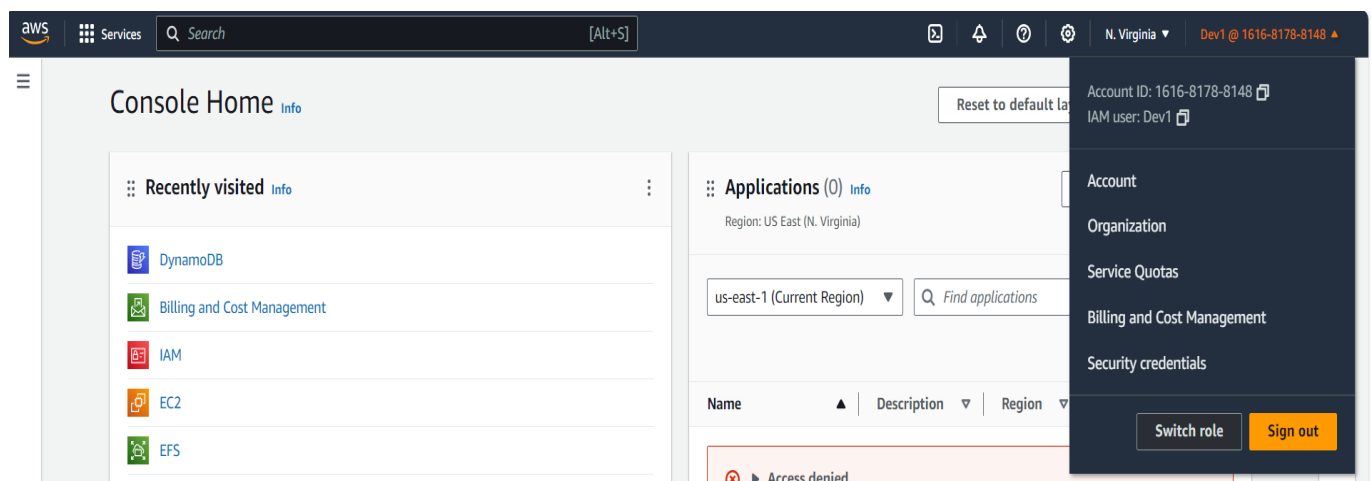

TASK2:

1. Sign in to the AWS Management Console as user1 i.e. Dev1

2. Click on "Switch Role" and follow the prompts to switch to the role.

Switch Role

Allows management of resources across Amazon Web Services accounts using a single user ID and password. You can switch roles after an Amazon Web Services administrator has configured a role and given you the account and role details. [Learn more.](#)

Switch Role

3. Once switched to the role, try accessing the VPCs and DynamoDB resources to ensure that access is restricted as per the defined policies.

The screenshot displays the AWS Management Console interface for the Amazon DynamoDB service. The top navigation bar includes the AWS logo, a 'Services' menu, a search bar, and the current user role 'Assignment3-Role @ 161681788148'. The left sidebar shows the 'DynamoDB' menu with various options. The main content area features a large heading 'Amazon DynamoDB' and a subtitle 'A fast and flexible NoSQL database service for any scale'. Below this, there is a 'Get started' section with a 'Create table' button and a 'Pricing' section.

4. After testing, sign out of the AWS Management Console.
